ELEMENTARY SCHOOL

SANTA LAURENSIA

Santa Laurensia, a progressive Roman Catholic school, located in lush and attractive Alam Sutera, provides a holistic education system with a global perspective to 3-18 years old children in an innovative learning environment.

CURRICULUM

Our curriculum incorporates the most recent trends in educational excellence. We apply the **Indonesian National Curriculum, Pearson Edexcel**, and best pedagogical approaches around the world to prepare our students for success both regionally and internationally.

Santa Laurensia Elementary School is focused on the student's entire development by involving critical analysis and creative thinking. Students are also encouraged to explore, gain their own understanding, and develop their personal character and faith.

These are accomplished through **a holistic and integrated approach.** We have a philosophy that by focusing on holistic development, each child could maximize their potential and abilities intellectually, socially, physically, emotionally, and spiritually.

On the one hand, discovery helps children craft their senses and cognition to communicate, to show empathy, to think critically, and to build confidence. On the other hand, through exploration, children learn to be open-minded, pro-active, reflective, enthusiastic, and responsible.

These two components are equally important in child development, and teachers are keen to provide platforms where children can explore and discover. Learning in such a way imparts knowledge and wisdom, the ingredients of the keywords above.

21st CENTURY SKILLS

To provide a holistic educational system with a global perspective, Santa Laurensia emphasizes the concept of **7C (Critical Thinking, Creative and Innovative, Collaboration, Communication Skills, Character, Citizenship, and Computational Thinking).**

Our school strives to help students reach their full potential, develop confidence, be competent leaders, and become responsible global citizens.
